

Commissioning and Service

Our service department provides high-quality installation and service for all types of technical systems worldwide. We have service personnel with many years of experience both onshore and offshore, ready to provide technical and optimal service at short notice. We carefully nurture a corporate culture of excellence. The human factor is fundamental to our future-oriented tailor-made solutions and services.

Elpro provides service and start-up for all technical installations, from newbuilding to rebuilding. Ranging from start-up of new electrical systems to finished, electrical systems with classification at a high level of quality. We can provide project managers for electrical installations to assist all types of electronic companies, yards or owners. We can also provide inspectors for all types of electrical installations and projects for yards and owners.

WE PROVIDE

We can offer rapid support and service by highly experienced service personnel performing commissioning and service for switchboards and all types of electrical systems. We also perform classification services for new and old switchboards and technical systems with DNV, ABS, LRS etc., ensuring that you have a safe and good quality system you can trust.

Our motto is to provide rapid, on-time service to all our clients worldwide. We can offer a worldwide service at short notice and at the right quality and right price, with high-quality and experienced service personnel.
