

Maritime Engineering

Throughout the decades, Elpro Electro has been involved in high-quality installation services for state-of-the-art and advanced ships. We have built our reputation on decades of industry experience, problem-solving skills, reliability and on-time delivery. We carefully nurture a corporate culture of excellence. The human factor is fundamental to our future-oriented, tailor-made solutions and services.

Elpro provides a full range of electrical engineering services, such as electrical steel drawings, all kind of electrical work drawings and tailor-made solutions for our clients. We also take responsibility for the interface between different suppliers in the project and approval of the technical documentation and guarantee management.

We have highly qualified personnel within different systems such as engine systems, deck systems, accommodation, bridge systems, communication systems, voice and warning systems, etc. We have experience for example from the world's first four-engine LNG RoPax/Cruise ships, diving support ships, highly advanced construction vessels with ROV systems, AHTS ships and seismic ships with 3D-16 streamer.

Due to recent developments in the shipping industry, with new kinds of systems, demand for more system integration and environmental requirements, every new project is a challenge that we look forward to accepting.

With our extensive knowledge and experience and our cooperation with trusted partners, we are fully updated in terms of new technology and can ensure that our clients and projects have the best solutions in terms of performance, efficiency and reliability. Our motto is to deliver at the right time, at the right quality, at the right price. In cooperation with Elpro Solutions, we can also offer a wide range of products such as main switchboards, bridge and engine room consoles, starters, sub distributions, custom-built solutions, etc.
