

## Easy installation on cable ladders with Elpro Quick Bracket

Elpro Quick Bracket reduces the installation time of equipment on cable ladders, making installation up to three times faster – saving contractors and installers both valuable time and money. No tools, no welding, and no fire protection. The Elpro Quick Bracket snaps quickly and easily onto all types of maritime cable ladders.

— Prior to the development of the Elpro Quick Bracket, we had to drill holes in standard iron brackets and weld them onto our cable ladders. It took a lot of time; the drilling, fireproofing the surrounding area and welding. Nowadays, we simply snap the Elpro Quick Bracket onto the cable ladder. No drilling, no welding and no fireproofing the surrounding area, explains the inventor of the Elpro Quick Bracket, Villy Løvnes.

### **Developed for quick installation without welding**

The Elpro Quick Bracket was developed for the maritime sector, who found themselves in need of a quick and safe way to install electrical equipment on cable ladders. The Quick Bracket removes the need to weld, significantly reducing the risk of fire while working near pre-installed cables on cable ladders, and removing the need to fireproof the surrounding area prior to installation.

## How to: Installation

The Elpro Quick Bracket is mounted by means of prefabricated “weakenings” in the bracket, allowing installers to easily click it onto and bend it over the beam of the cable ladder. A wide variety of prefabricated screw holes ensures easy installation of almost any type of boxes and fixtures commonly mounted in connection to cable ladders – such as junction boxes, sockets, fire detectors, and light fixtures.

## Benefits

- Easily mounted without tools – clicks onto pre-installed cable ladder.
- Avoid welding and fireproofing.
- Minimum three times faster installation.
- Cost efficient.
- Shipped flat-packed. Easy to transport.

## Installation

- Easy installation on all types of cable ladders.
- Prefabricated screw holes – fits all types of cable boxes, as well as other equipment commonly mounted above cable ladders.
- Can be tailored to customer needs and demands.

## Product information

- Make/ Brand: Elpro
- Suppliers item number: E1301831
- Weight: 0.15 kg

## Typical applications

- Cable installation in the maritime sector.

## About Elpro

The Elpro Group consists of three well-integrated business units; Solutions, Electro and Installation. Elpro has over 30 years of experience within the electro technical and electro mechanical sector. A wide spread of clients across our project portfolio has accumulated a lot of problem solving skills and industry knowledge. Talk to an experienced partner for your next project. Talk to Elpro!
